natural ventilation

Introducing a new way of thinking about building ventilation. The need of which is choosing the appropriate type of ventilation.

ventilation variables

Each room has its own unique ventilation needs. As these factors change, the ventilation system must adapt to the changing needs of the space.

product developments

REUSE, RENOVATION:

Tub Tetris

For tight spaces, awkward shapes and difficult footprints, **Maax Bath's** ModulR fit features tubs, shower bases and shower doors that achieve the look of a custom installation. The system's U tile—an engineered polymer surface panel—acts as an alternative to conventional ceramic tiles to enable a wide variety of configurations for bathtubs, shower bases and shower doors. The grout-free U tile system features organic, factory, marble, wallpaper, smooth and erosion finishes. Visit www.maax.com or **Circle 427**

U tile's engineered polymer offers an authentic tile or stone experience; specify frame, finish, drain position and accessories for a custom fit and finish.

Project: The Tin Box
Location: Miami, FL
Product: Bolted Steel Frame - Exposed Interior - Value Engineering
Prefab design + Engineer: EcoSteel
Architect: David Rifkind

DESIGN CONCEPT

The company has developed a system of pre-fabricated steel parts that can be assembled onsite.

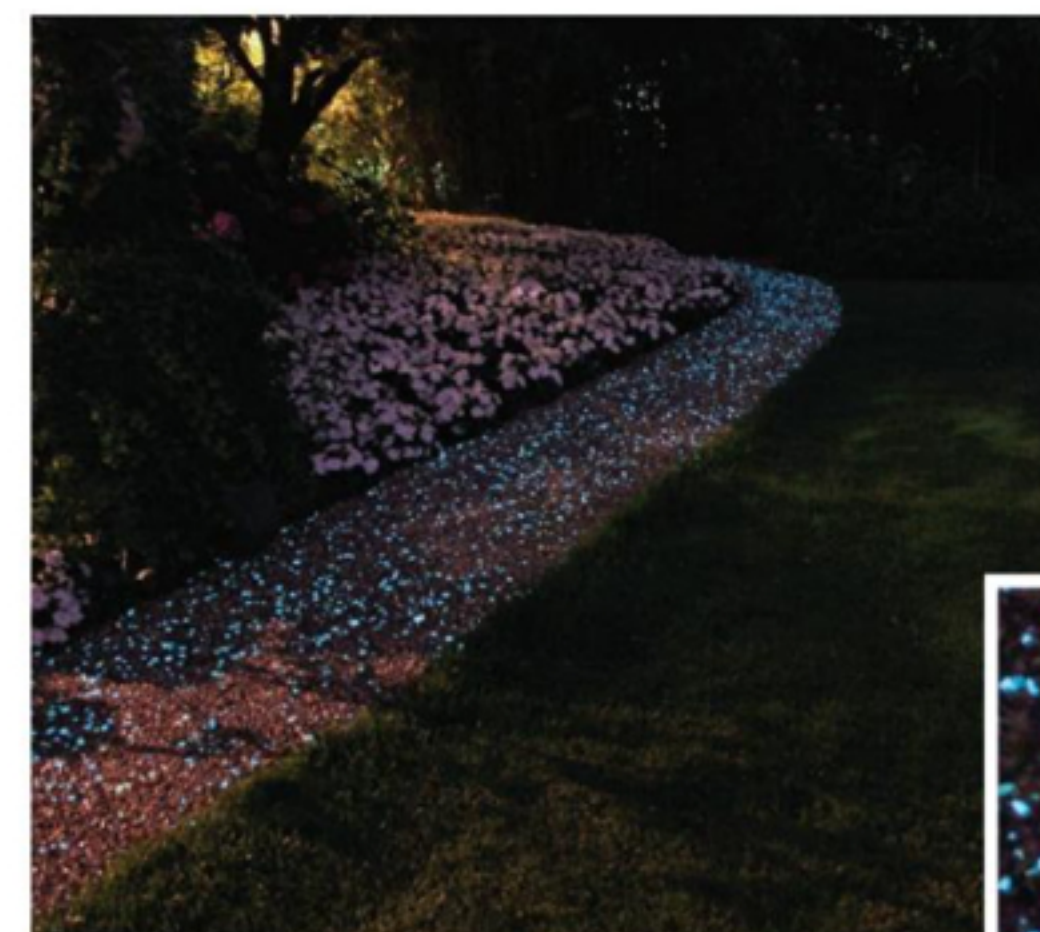

Project: L.A. Medical Office
Location: Burbank, Calif.
Product: Title 24 - Non-combustible - Earthquake Resistant
Prefab Design + Engineer: EcoSteel
Architect: TSArchitects

RESILIENCE:

Steel-ing the Show

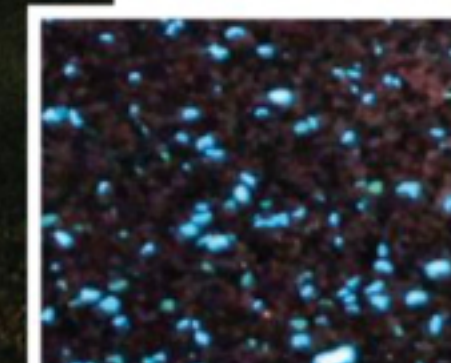

EcoSteel insulated structural steel panels accelerate construction timelines, and the Title 24-compliant product has two-hour fire-rated panel components that may be left exposed to the interior for an interesting urban industrial aesthetic. The structural concept design features a fully customized system steel kit for any building envelope that requires fire, mold, weather and termite-resistant applications. LIGHTING & LANDSCAPES:

Moonwalk

Italian landscape design firm, **Paghera** has introduced Fluo, an intelligent exterior pathway media that magically illuminates a trail at dusk and into the evening hours with bioluminescence. Combine this resin gravel among conventional stone, pea gravel or crushed quartz and limestone for a twinkling effect, or imagine it outlining the organic joints of a flagstone pathway. Visit www.paghera.com or **Circle 425**

INTELLIGENT PATHWAY

Combined with stone, pea gravel or quartz and limestone, the resin gravel pathway illuminates the trail with a twinkling effect.
